

TinyLineMarker

World's fastest line marking robot

Paint field in <20 min

Adjust field layout, press start and let the robot paint while you tend to the goals, holes, wear and tear of the fields. This improves not only the fields, but the overall turf quality.

First markings of new season

Instead of measuring angles and distances by hand at the beginning of every season, simply select the desired field lay-out and press start. The TinyLineMarker takes care of the rest.

Lines never disappear

Season's change, grass grows, paint wears off - and lines fade and must be remarked. But the pitches are always right there on the tablet, ready to be marked again.

Simple commands

Create, resize, copy or move pitches in minutes. The tablet supports automatic and manual mode, making it easier for groundsmen to do line marking work.

Specifications

Structure

Weight excl. battery	30 kg / 66 lbs
Height	548 mm / 21.5 inches
Length	787 mm / 31 inches
Width	738 mm / 29 inches
Jerry can (HxLxW)	370x240x200 mm (10L) 14.5x9.5x8 inches (2.6gal)

Battery

Weight	4 kg / 8 lbs
Type	Li-Ion/replaceable
Performance	Minimum 5 hours

Usage

Support	Remote via Internet
Pitch data	Online back-up
Control unit	User-friendly tablet solution
Max. marking speed	4 km/h / 2.5 miles/h
